## Project 2 Report Data Cluster using K-means algorithm provided by the system.

Submitted By: Priyank Arora (1001553349)

## **Description**:

Using k-mean algorithm to split the data into k classes and calculating the accuracy using Hungarian algorithm,

- 1. We use the same number of classes in kmean as there is in original data.
- 2. Obtain the confusion matrix using the original labels and predicted labels.
- 3. Use hungarian algorithm to solve the confusion matrix and obtain the accuracy of k means.
